MD Health Clinics and Innovative Medicine of Orange County (IMOC)

Robert Russell Kutzner, MD

Changes in the healthcare system today have people concerned about “choices” regarding medical care and treatment for family and loved-ones.

Forbes magazine states patients will seek out independent agencies to collect, store and review medical records, represent them in hospital stays, and advise them in all aspects of their medical care. They will serve as an advocate for the patient, in much the same way as an attorney is an advocate for clients.

Innovative Medicine of Orange County (IMOC) is that agency providing you a concierge service for medical consultation and representation. Patrick Godinez, physician liaison, will guide you through the process, from start to finish; coordinate and help “case manage” your medical consultations to ensure satisfaction. MD Health Clinics, through Dr. Kutzner shall provide you with an evidence-based, step-by-step diagnosis, prognosis, and treatment using an integrated multi-disciplinary approach. With virtual telemedicine technology, Dr. Kutzner can also communicate with different medical specialists, experts and healthcare providers. IMOC will consult an attorney specializing in patient and physician rights, if deemed necessary to achieve the high standard of healthcare that you expect for yourself and loved ones. IMOC will help you manage your healthcare, so it does not manage you.

If you have pain, or know someone who does, or have any questions about medical treatment, or know someone struggling with prescription pills, please

visit www.InnovativeMedicineOC.com for more information and set-up an appointment for an initial virtual medical consultation, or www.MDHealthClinics.com for more information about Dr. Robert Kutzner’s group medical practice and locations.
